MAX FALL HEIGHT=64"

Freestanding Play
(5-12 years)

The play components certified on this plan are IPEMA certified. Please refer to the IPEMA website for more information. The use and type of these components is subject to the manufacturer's instructions and safety guidelines.

This play area is play equipment designed for ages 5-12 years unless otherwise noted on plan.

It is the manufacturer's opinion that this play area does conform to the ADA accessibility standards, assuming an accessible protective surfacing is provided, as indicated, or within the entire use zone.

This conceptual plan was based on information available to us prior to construction. Review site information including site conditions, proposed existing utilities, soil conditions, and drainage. Existing utilities be retained, relocated, or replaced in the final design. Please verify all dimensions of play area, fall protection, and location of all existing utilities, equipment, and site furnishings prior to installing. Slides should not face the hot afternoon sun.

Verify a protective surfacing material that has a critical height value to meet the minimum fall height for the equipment. Use ASTM F1487 Standard Consumer Safety Performance Specifications for Playground Equipment for Public Use. Section 4 current revision. The surfacing must be well drained. If the soil does not drain naturally it must be tilled or graded (4:1 to 1:4) for 100 feet to a storm sewer or a trench drain.
